Education

University of Vishveshwaraya College of Engineering. 2028
B.Tech in Computer Science. Bengaluru, India

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS
AI Frameworks: Langchain, Langgraph, Chroma DB, Open AI, Google Gemini
Backend: Django, FastAPI, Express.js, Node.js, Postman API, Websockets, REST API's
Databases: MongoDB, PostgreSQL
Cloud: Google Cloud Platform, Firebase, AWS
Languages: Python, JavaScript, C++
Tools: Git, GitHub, Vercel, Render, VPS, Figma, Cloud Run, Docker

Experience

Software Development Engineer April 2025 - Present
Codedale India

- Built and maintained 100+ robust backend endpoints using TypeScript and Next.js, reducing API response time by 90% and improving system reliability for 100k users.
- Designed and implemented PostgreSQL schemas and Drizzle ORM models handling 20K+ records, optimizing queries and reducing average database load by 60%.
- Contributed to 50+ production features end-to-end, including API design, secure authentication, and data validation, supporting 10k+ active users.

Founder & Lead Engineer Aug 2025 - Present
Neylon AI India

- Founded Neylon AI, an AI agency delivering scalable AI assistants and agent-based solutions, serving diverse clients with intelligent automation.
- Developed AI agents using LangGraph, LangChain, and vector databases, implementing a RAG pipeline capable of handling 20K+ data records efficiently.
- Engineered the platform to process and query 10GB+ datasets seamlessly using Django backend and Next.js frontend, ensuring high-performance AI workflows.

React.js And Node.js Developer Sep 2024 - Aug 2024
UVCE College Bengaluru, India

- Developed a college website by merging two existing websites into a unified platform, improving accessibility and user navigation.
- Utilized React.js and Styled Components for a modern and dynamic frontend experience, enhancing interactive UIs.

Projects

AI-Powered Market Sentiment Analyzer | [View Live](#) March 2020 - April 2024

- Developed an AI-driven sentiment analysis tool that gathers 100,000+ data points daily from crypto news, social media posts, and market trends.

- Integrated Natural Language Processing (NLP) using VADER, achieving 85%+ accuracy in sentiment classification (bullish / bearish).
- Built a scalable backend with Flask, handling 500+ API requests per second while fetching data from RSS feeds, Twitter API's and crypto forums.
- Potential Impact: Help traders reduce decision-making time by 30%, improving trade success rates based on sentiment analysis.

MERN Launcher - Automation for MERN Stack Setup | [View Live](#)

April 2024 - March 2024

- Developed an automation tool that streamlines the setup of a fully functional MERN (MongoDB, Express.js, React.js, Node.js) stack with a single command.
- Automated the installation of frontend and backend dependencies, including React Router, Redux, Express, Mongoose, and authentication modules.
- Potential impact: Reduces setup time from hours to minutes, enabling developers to kickstart MERN projects with minimal effort.

Feature-Rich eCommerce Platform | [View Live](#)

May 2025 - August 2025

- Engineered a full-stack eCommerce website with modern UI/UX using React and Styled Components.
- Implemented OAuth authentication (Google, Facebook) for seamless user access and secure login.
- Integrated Razorpay for secure payment processing and Firebase for dynamic product management.

CloudMetrics Dashboard

August 2025 - September
2026

- Designed and developed a cloud monitoring dashboard using Next.js and Express.
- Integrated AWS CloudWatch APIs for real-time data visualization.
- Deployed application using Docker on AWS EC2.
